Summary

Data Science and Machine Learning practitioner specializing in Generative AI, RAG architectures, and Agentic workflows. Proven experience in developing intelligent systems using Python, TensorFlow, and Scikit-learn, with a focus on prompt engineering within the OCI Playground environment. High-achieving student (CGPA: 9.01) with supplementary experience in blockchain applications, seeking to build scalable, AI-driven solutions.

Experience

Tatvaops | by EROEI Teach Pvt Ltd

Feb 2026 – Present

AI/ML (GenAI) Intern

Bengaluru, KA

- **QuoteSense (Quote Comparison & Extraction):** Developed a "2-lane architecture" system utilizing Vision Language Models (VLMs) to automate data extraction from unstructured quotes, reducing manual processing time by **40%**.
- **Database & RAG Integration:** Integrated Supabase for real-time data storage and engineered a PageIndex RAG bot, improving document retrieval accuracy by **35%** across complex datasets.
- **TatvaLogistics (Fleet Optimization):** Engineered an AI-driven logistics mapping platform using LLMs and Agentic workflows, optimizing vehicle payload capacities to consistently achieve **90%+** space utilization.
- **Conversational AI:** Architected RAG-powered conversational bots for automated rental estimations, decreasing response latency and significantly improving client interaction quality.

Technical Skills

- **Programming & Frameworks:** Python, SQL, **FastAPI**, **Node.js (TSX)**, C++, Streamlit.
- **ML/DL Frameworks:** TensorFlow, PyTorch, Scikit-learn, Hugging Face, OpenCV.
- **Generative AI & LLMs:** RAG, Agentic AI, Prompt Engineering, LangChain & LangGraph, Vector Databases, Memory Engineering.
- **Developer Tools:** Git, GitHub, Docker, VS Code, Jupyter Notebook, Google Colab, UiPath.

Projects

Mirage: AI Image Protection — [Demo](#)

Mar 2025 – Apr 2025

- We build a data-poisoning system for image protection (36.33 dB PSNR) integrated with **Blockchain + IPFS** for decentralized ownership and 99.9% data integrity.

Sentio Bot: RAG-Powered Support Agent — [Demo](#)

Sep 2025 – Oct 2025

- Built a RAG chatbot achieving **95% accuracy** and 80% hallucination reduction, attaining a 98% retrieval hit rate on domain-specific knowledge bases.

Education

B.E., Computer Science & Engineering

2022 – 2026 (Expected)

AMC Engineering College, Visvesvaraya Technological University (VTU)

CGPA: 9.01/10.0

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional *Oracle*
- Retrieval-Augmented Generation (RAG) Specialization *Coursera*
- Robotic Process Automation (RPA) Developer Training *UiPath Academy*

Achievements

- Advanced through national rounds of **Smart India Hackathon (SIH)** and **HackFest**.
- Technical Coordinator/Volunteer for **HackZion v1.0**.
- Published multiple open-source ML and Blockchain projects on GitHub.
